

KNUS KRIGSMASKINEN
STOPP CHEMNING NOBEL

AKTIVT FORSVART SÖM

KNUS KRIGSMASKINEN
STOP THE WAR MACHINE

JOIN THE RESISTANCE!

We have occupied the abandoned military barracks in Avgrunnsdalen and established an Actively Defended Zone (AFS) in Hurummarka!

We support the locals in defending Hurummarka from the Ministry of Defense and Chemring Nobel's planned explosives factory (Europe's largest), a central part of the profit-seeking military-industrial complex. It will require 15 square kilometers of forest, equivalent to 2,100 football fields. Chemring Nobel also has a long history of releasing Nitrogen and other chemicals into the Oslofjord. The factory will increase the release of Nitrogen into an already dying fjord.

The factory is not to be built for self-defense as claimed, but to enrich shareholders and owners while expanding the war machine and the American empire. Chemring Nobel is 100% owned by the British Chemring Group PLC, of which the American BlackRock is the largest shareholder. 90% of Chemring Nobel's production is exported abroad – mostly to the American arms industry (Lockheed Martin, Northrop Grumman and Space X), and thus directly to the genocidal regime of Israel.

We know that explosives produced at Chemring are part of the American-made Hellfire missile, which is widely used in Israel's genocide of the Palestinians. Last year, Chemring and Nammo secured a twelve-year agreement with German Diehl Defence to supply ammunition to the German military. Diehl, in turn, cooperates closely with the Israeli arms industry.

Join the fight and come out to the Avgrunnsdalen!
